

# COMPLEXITY ORIENTED LEARNING IN HEALTH – FROM FRAMING TO EDUCATING

This event intends to build a bridge from our project's frame of reference for complexity-oriented learning towards the development of the learning systematic. We will not present results excathedra, the event will offer in an interactive format that creates an open, eye-level atmosphere with a participatory approach, during campfire sessions. The event venue set-up follows the approach and is equipped in an engaging environment which is different from regular classroom or conference settings. After the event, participants are invited to become part of a complexity-oriented learning research panel.

Online Or Face to face

Registration for online or  
face to face participation is free:
